

# The FactoryTrac™ System

**EUREKA**  
WOODWORKS

« BUSINESS PROGRAM »

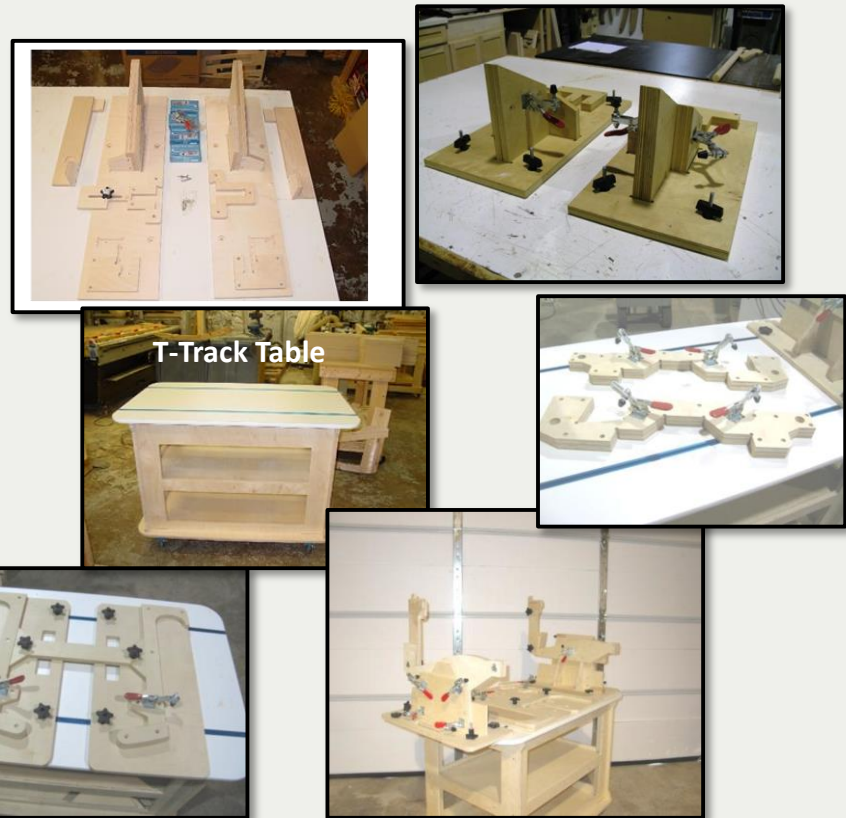

Simply stated, the FactoryTrac™ System is the soul of our Programs. It is a set of steps and processes, jigs and templates that allow you to efficiently and consistently create high quality furniture over and over again.

The FactoryTrac™ System was developed over a period of many years drawing upon the extensive experience of expert woodworkers who developed the best woodworking processes, jigs and templates in the industry.

The jigs and templates are cut on state of the art CNC machines and then manually ensembled. Each part has been tested in the crucible of real production for over 15 years! We've incorporated feedback from our hundreds of producers and continue to update the jig and template designs to meet everyday real-world woodworking needs.

For efficiency and repeatability, the assembly jigs are mounted on our custom manufactured T-Track Table.

You'll be amazed at how quickly you can build heirloom quality artisanal furniture on the first attempt!

Speed & Consistency = Keys to a Successful Operation
